PROFESSIONAL SUMMARY

Software Engineer — Unity, XR & Interactive Systems

Software Engineer with a strong background in Unity-based development, XR applications, and interactive systems. Holds a Master's degree in Software Engineering from the University of Greater Manchester and a BSc in Computer Science from Bilkent University. Experienced in designing scalable, maintainable software architectures, real-time systems, and user-facing applications across mobile, XR, and interactive platforms.

WORK EXPERIENCE

Indiecore Studios

United Kingdom

Lead Unity Developer (Contract)

December 2025 – Ongoing

- Leading development of core gameplay systems, player data pipelines, and progression logic as the primary software engineer in a small cross-functional team.
- Architected modular and scalable systems with a strong emphasis on maintainability, data-driven design, and long-term extensibility.
- Worked with Unity 2D/3D, C#, Git-based workflows, Jira, and tweening libraries to deliver production-ready features.

Rapsodo

Singapore

Unity XR Developer

March 2024 – December 2024

- Developed VR and AR sports simulation applications integrated with hardware devices, delivering real-time interactive experiences on mobile and XR platforms.
- Contributed to shared XR application architecture, including UI frameworks, device communication layers, and cloud-delivered content workflows used across multiple products.
- Utilized Unity, C#, Addressables, Odin Inspector, Jira, and DOTween within a collaborative, production-scale environment.

Narcade

Istanbul, Turkey

Mobile Game Developer

February 2023 – February 2024

- Developed and maintained multiple mobile puzzle games, focusing on UI systems, player progression logic, and data handling pipelines.
- Improved navigation flows, performance, and modularity of UI and progression systems through refactoring and optimization.
- Worked with Unity 2D, C#, Zenject, Odin Inspector, Jira, and DOTween in a fast-paced mobile development environment.

EDUCATION

University of Greater Manchester

September 2025

Master of Science in Software Engineering

Bolton, United Kingdom

- Conducted a research project exploring AR/VR software applications in psychological therapy contexts.
- Graduated with distinction for final thesis project.

Bilkent University

July 2023

Bachelor of Science in Computer Science

Ankara, Turkey

- Awarded a full scholarship based on exceptional national placement exam performance.
- Tutored undergraduate students in game development and software design through the Bilkent Game Developers Club.

TECHNICAL SKILLS

Programming Languages: C#, Python, Java, GDScript, JavaScript, TypeScript, C/C++

Technologies: Unity, Godot, GameMaker, OpenGL/WebGL, OpenXR, AR/VR, Meta Quest ecosystem, Jira, Selenium WebDriver, Zenject, Odin Inspector, DOTween, SQL, Unity Package Manager (UPM)
